Dear Readers

Warm Greetings!

A healthy learning process is akin to building a brick wall---each brick counts. It's not just about what students learn, but also how they learn. A good process makes education enjoyable, and builds learning skills, which is the foundation of self-learning and education in future. Keeping in view, we at D.A.V PPS lay accentuation on very core of education so that it will be constructive for a child to become well- balanced human being. Not only education but the need of hour is to instill a high level of EQ (Emotion Quotient) among children in the formative years itself. Students with high EQ use emotional information to guide their thinking and behaviour. They can easily adjust their emotions to adapt to their environment when acquiring their goals.

Emotional learning is understanding that you don't always get what you want but that you must learn to handle it. We are in process of making students emotionally balanced. Above all, we teach them the significance of gratitude. When students look at the bright side of life and feel grateful for all they have, this allows them to be optimistic and work towards a better life. Fear, love, anger, joy, empathy, patience, confidence, enthusiasm, and goodwill are some examples of emotions that we are ameliorating for the holistic development of our students.

Right education is a mutual task demanding patience, consideration, and affection. Enlightened teachers in enlightened community could work out this problem how to bring up children rightly. I feel immense pleasure stating that my teachers are constantly alert and intensely aware of the ways to impart value education among learners. I congratulate all my students for their scintillating result and wish them all good luck for the next class!

"Always remember that you are absolutely unique. Just like everyone else."

Thank You

Have a fantabulous year ahead!

A study schedule is an effective way to help students navigate through their board and annual examination pressure with ease and hold them accountable for their own learning outcomes. Students were called to school during Annual Examinations for preparation which allowed them to see how they spend time and ensure that they are setting aside enough time to review and retain the information they are learning. Enough time and sheer guidance was provided to them by teachers for the desired outcomes. Students were certainly benefitted from the efforts of school management.
